## DETAILED ACTION

### *Specification*

The disclosure is objected to because of the following informalities: page 4, last line, the word "machin" should be replaced with the word --machine--. Page 5, line 26, the word "tonnes" should be replaced with the word --tons--.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-9, 11-13, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi et al (U.S. Patent No. 4,055,313) in view of Gay et al (U.S. Patent No. 2,092,966).

With respect to Claims 1, 3-9, 11-13, 15 and 16, Yamaguchi et al, Figures 1 and 2, teaches providing a full-width paper web 11 issuing from a paper machine having a production width, providing a plurality of first reel spools (see Fig 2) and reeling said full-width paper web in a first reel-up 1, (*Note that wound reels 12 are placed on carts and taken away for further processing*); returning the empty first reel spool to said first reel up. Gay et al, Figures 1-6, teach unwinding a paper web 2; passing the web through a finishing machine 3 and reeled up in a second reel-up 7 wherein the first reel arranged between the paper machine and the unwinding station has a different dimension than the second reel spool. It would have been obvious to one

Art Unit: 3654

of ordinary skill in the art to send the first reeled up web to an unwinding station, as taught by Gay et al, for the purpose of further treating the web. Further it should be noted that it is well known in the art to move rolls to different areas for further handling. Therefore It would have been obvious to one of ordinary skill in the art that the rolls such as those of Yamaguchi et al could be moved to be finished by the method shown by Gay et al.

***Response to Arguments***

Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

The new grounds of rejection were necessitated by applicant's amendment, e.g., the requirement for "providing a plurality of first reel spools", "passing said reel to an unwinding station", "unwinding the full-width paper web from the reel in said unwinding station and returning the empty first reel spool to said first reel-up".

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3654

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
